

TonnUp Storage Site Requirements:

Version 1 – 2021

Now that you are considering adding your storage sites onto the TonnUp platform, please review our minimum requirements and should you have any questions simply email us on info@tonnup.co.za

Storage Type:	The storage facility must be a permanent structure.
Storage Capacity:	Minimum storage capacity of 500 Tons.
Out loading Capacity:	Minimum of 100Tons per day.
Out loading Availability:	You must be able to out load in both Wet and Dry weather.
Weighbridge:	Your site must have a functioning Weighbridge.
Weighbridge Calibration:	Your Weighbridge must be calibrated and a certificate of calibration must be available.
Insurance:	You must carry insurance on both the structures and underlying products stored.
Independent Inspection:	You must be willing to have us send our independent inspection company to come and verify your site. The inspection report will highlight if any additional infrastructure is required or not.
Inspection Fee:	You are responsible for the inspection fee, which is currently R5500 and payable directly to our inspection partners.

Please bear in mind that we want you to make use of your own storage sites and leverage your existing investments, however, this does come with terms and conditions as well as responsibilities and we will always want to serve the needs of both buyers and sellers.

Thank you for your interest and we look forward to working closely with you.
Sincerely
Team TonnUp
